EXPERIENCE

Freelance Web Developer, Las Vegas

Jan 1st, 2019 - Present Day

As a freelance web developer, I work with clients to build sites to fit their company needs. I also plan out their keyword strategy, site structure, manage contracted back end developers and designers that are needed for the projects.

Scalable Group, Las Vegas — *Front End Developer*

Jan 1st, 2018 - Dec 31st, 2018

Work with designers, back-end developers, marketing and clients to build the projects to spec. Working in WordPress, Laravel, Shopify, basic HTML/PHP, and React.

Reflex Media, Las Vegas — *Front End Developer - Project Lead*

Dec 2013 - Nov 2017

Manage the front end of the company sites, working with a custom framework, WordPress, Laravel, SASS, Smarty and Blade. I would take mockups and turn them into a functional site or components.

Social Road Media, Las Vegas — *Manager - Web Developer*

Jan 2013 - Dec 2013

I was in charge of building sites from the ground up, planning out the path we would use to launch a site, and working directly with clients to ensure that the site we built for them would function and look just as they specified.

KJR Management, Las Vegas — *SEO Tech - Design Manager*

Jun 2009 - Jan 2013

I started off working as an SEO tech, building site purely to get them ranked on Google, Bing, and Yahoo. I then moved on to be the Design Manager, where I would build custom sites for clients from the ground up. I was the main point of contact for clients well in this role.

A LITTLE ABOUT ME

With 10+ years of professional experience in many areas of web development, I have a rock-solid understanding of HTML/5, CSS/3, jQuery and Mobile First Design. Along with that, I am acceptable at JavaScript & PHP. I have experience with React but would say I am still learning.

I am able to take on projects that are built on WordPress, Laravel, Shopify and many more. If I do not know it, I am willing to learn it. After all, that is part of the fun of being a web developer.
